ABSTRACT

This 48th annual edition includes listings for over 1,000 libraries of all types in Florida, with contact names, phone numbers, addresses, and e-mail and web addresses. In addition, there is a section of library statistics, showing data on the use, resources, and financial condition of Florida's libraries. The first section consists of listings for Florida Division of Library and Information Services library organizations, councils, and associations. The second section is the directory of libraries, with listings divided by public libraries, academic libraries, special libraries, institutional libraries, and school library media supervisors. The third section consists of academic library data selected from the 1996 IPEDS (Integrated Postsecondary Education Data System) survey administered biannually by the U.S. Department of Education, National Center for Education Statistics. Data on staffing, operating expenditures, collections, and services are provided for community and state university system libraries. The fourth section lists public library data, and includes a narrative statistical summary, selected historical data, summary income and expenditures, and population served by public libraries, by county. Public library data tables are included for: access to library service--number of outlets, square feet, and Sunday hours; library staff--full-time equivalents and salaries and benefits; operating income and expenditures--totals and percent by source and category, per capita, and capital outlay; collection; library use; and public library cooperatives--fiscal and use data. Indexes of personnel and libraries arranged by county are included. (SWC)

We are pleased to provide the 48th annual edition of the *Florida Library Directory with Statistics*. In this publication, you will find listings for over 1,000 libraries of all types, with names, phone numbers, e-mail and web addresses.

There is also a section of library statistics, showing data on the use, resources, and financial condition of our libraries. Florida is recognized as a national leader in the collection and analysis of public library data, and we participate in the Federal-State Cooperative System, a program of the National Center for Education Statistics.

With today's emphasis on measurable evaluation of programs, the collection and use of accurate performance and resource data are increasingly important. The Division of Library and Information Services provides tailored data reports and technical assistance on request.

Public library data are used by local library managers and public administrators for planning, evaluation, and resource allocation. These data are also important to academic and government researchers investigating and developing public policy regarding information transfer and access.

This *Directory* is a collaborative effort of Florida's entire library community. Libraries of all types provide us with timely information; public libraries make a particular effort to supply accurate and timely detailed statistics. I along with my staff in the Division of Library and Information Services welcome your comments and suggestions regarding this important annual publication.

Secretary of State
